WEATHER OF CONCERN

Weather of Concern

- Santa Ana winds will continue through Monday with gusts of 30 to 45 mph for the wind-prone areas of Los Angeles and Ventura Counties. These Santa Ana winds combined with humidities in the teens and single digits, along with very dry fuels, will continue to bring the extended period of critical fire weather conditions to much of Los Angeles and Ventura Counties.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

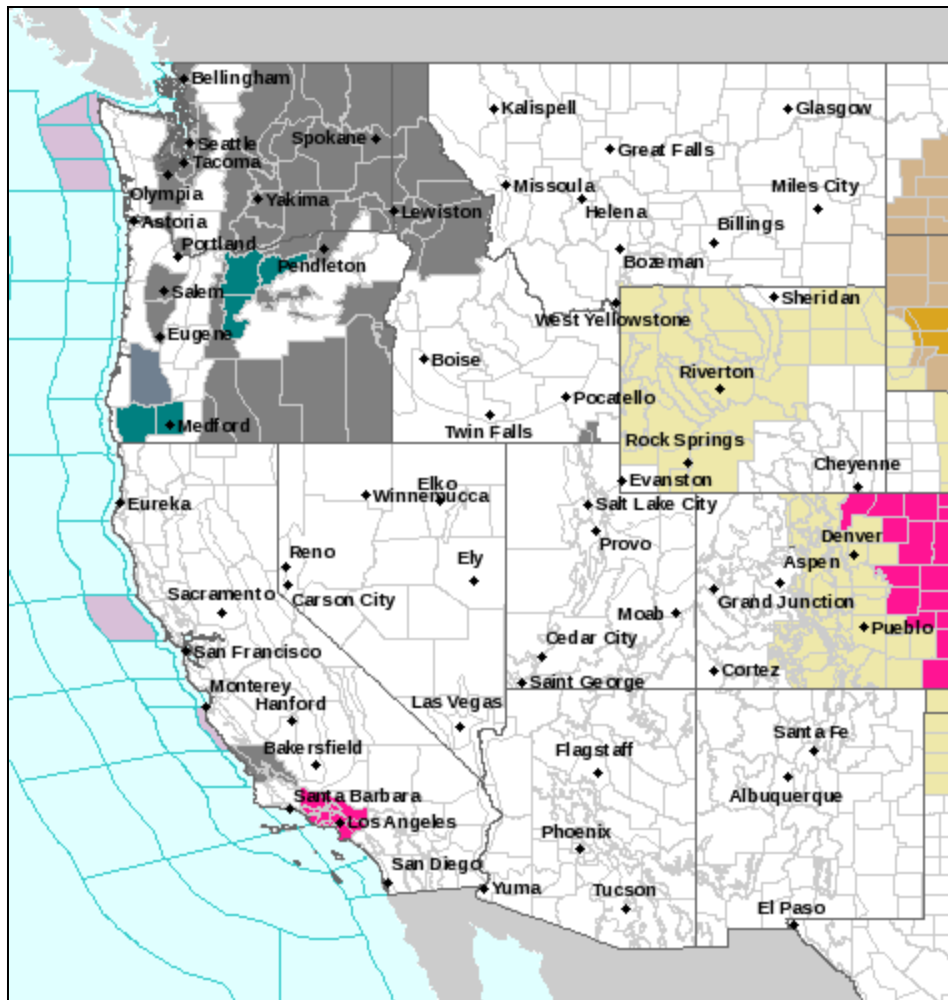

Dry weather accompanied with mild afternoons and cool mornings will continue this week. High pressure will weaken briefly this weekend as trough slides over the region. This will bring an increase in cloud cover and the potential for some light rain.

SOUTHERN CALIFORNIA

Continued warm and very dry throughout the week

Offshore winds will continue through the coming work week. In general, winds of 10-20 mph with local gusts to 30 mph will be possible during the night and morning hours. Light sea breezes may return to the coastal areas during the afternoon hours. Temperatures will remain 15-20 degrees above average throughout the week with highs in the 70s to lower 80s near the ongoing incidents. Minimum relative humidity (RH) will crater each afternoon with readings reaching the single digits each day in all but the highest elevations and the San Joaquin Valley. But RH recovery should be a bit better this week. By Friday, a weak trough may push into the area, bringing a temporary cooldown and a brief resumption in stronger onshore flow. No rain is expected through the period.
